

WISSEM BADRAOUI

Engineering student at IMT Nord Europe · Seeking a 12 to 16-week internship from June 2027

✉ contact@wissem.pro 📞 +33 6 03 16 34 17 📍 Paris area · Lille, France 🇫🇷 French citizen 🚗 Driving licence

With a focus on software development and data, I spent two internships modernising internal tools used daily, with high standards of reliability and confidentiality. I now aim to move towards data science and information systems security, working on concrete projects within an experienced team.

EDUCATION

- **IMT Nord Europe · Institut Mines-Télécom** 2024 – 2029
General engineering degree (Master's level) · 1st year of the engineering cycle Lille, France
 - Scientific and methodological core curriculum, then a planned specialisation in computer science.
 - Completed the integrated preparatory cycle in 2026; projects: **C/SDL2** game, **Python** password manager.
 - 7-month team project: managing budget, schedule and deliverables.
- **Lycée Saint-Paul** 2021 – 2024
French Baccalauréat, Mathematics and Physics-Chemistry · Highest honours Angoulême, France

PROFESSIONAL EXPERIENCE

- **French Public Finances Directorate (DGFIP)** June – Aug. 2026 · 11 weeks
Intern · Software development and data · Risk and Audit Unit Paris, France
 - Redesigned a **Python/Tkinter** application supporting payment audits (architecture, interface).
 - Processed datasets of several million rows with **DuckDB** and **SQLite**, removing redundant computations.
 - Built free-text and multi-criteria search, account review and a report-writing assistant.
 - Iterative, batch-based delivery with the team and auditors, end-to-end testing and documentation.
- **Nidec Leroy-Somer · Engineering Department** Jan. – Feb. 2025 · 6 weeks
Intern · Improvement of an internal test-management tool Angoulême, France
 - Gathered requirements from technicians and engineers using an **Excel/VBA** test-tracking tool.
 - Made data processing and calculation methods more reliable and redesigned the user interface.
 - Developed new features in **VBA** and validated results against real data.

PERSONAL PROJECTS

- **Wissem's Industries · Infrastructure and web applications** 2025 – present
Personal project · design, deployment and maintenance wissem.pro ecosystem
 - Self-managed Linux server: **Docker** services, continuous deployment, single sign-on.
 - Web applications in **TypeScript** (Nuxt, Vue.js) and **Node.js/Express** APIs: portfolio, admin panel.
 - Shared **PostgreSQL** database across services, documentation and versioning for each project.
- **Rubik's Network · Online gaming community** 2020 – present
Volunteer technical contributor Remote
 - Wrote specifications and coordinated updates with developers and designers.
 - Developed features, provided user support and prioritised reported issues.

SKILLS

Programming	Python, SQL, C, TypeScript/JavaScript, VBA
Data	PostgreSQL, MySQL, SQLite, DuckDB, MongoDB, Prisma, advanced Excel, CaseWare IDEA
Web & systems	Node.js, Express, Nuxt, Vue.js, REST APIs, Linux, Docker, CI/CD
Tools	Git, GitHub, JetBrains IDEs, AI agents, Postman, Jira, Microsoft Office, Typst
Methods	Requirements analysis, iterative delivery, testing and acceptance, user documentation
Soft skills	Rigour, autonomy, professional discretion, teamwork, curiosity, adaptability

LANGUAGES, CERTIFICATIONS AND INTERESTS

Languages	French (<i>native</i>) · English B2 · Spanish A2
Certifications	Duolingo English Test: 100 · TOEIC: 850
Engagement	Orion Jeunesse Hackathon, French Ministry of Armed Forces · Lille, March 2026 · 24 h
Interests	Transport (<i>rail, urban and aviation</i>), swimming, cinema, travel, billiards
